

2018 Educator Stipends Awarded

Thanks to the **PERKINS COUNTY SCHOOLS FOUNDATION** for awarding Perkins County teachers Tammy Hutcheson (Kindergarten) and Deanne Bishop (HS Science/Curriculum Director) stipends to use for their classrooms. Combined, they were awarded **\$955.00** for the following proposals.

TAMMY HUTCHESON (Kindergarten): Two Sensory Bins and a Differentiated Workstations Stand - The sensory bins would allow for activities that stimulate children's senses while they create, explore and investigate items. The stipend will also help purchase some of these sensory and fine-motor skill items. The differentiated workstation uses mini-pockets to organize varying-levels of reading, math and language arts tasks.

DEANNE BISHOP (HS Science/Curriculum Director): Compressed Air & Water Rocket Launcher Kits & Accompanying Accessories - These will be used by the students in her Experimental Science class. Students will build the launchers, rockets and use varying parachutes and fins to test the rockets' altitude and horizontal launching distances. This unit incorporates S.T.E.M. (Science, Technology, Engineering and Math) concepts.
